

Fig. 1

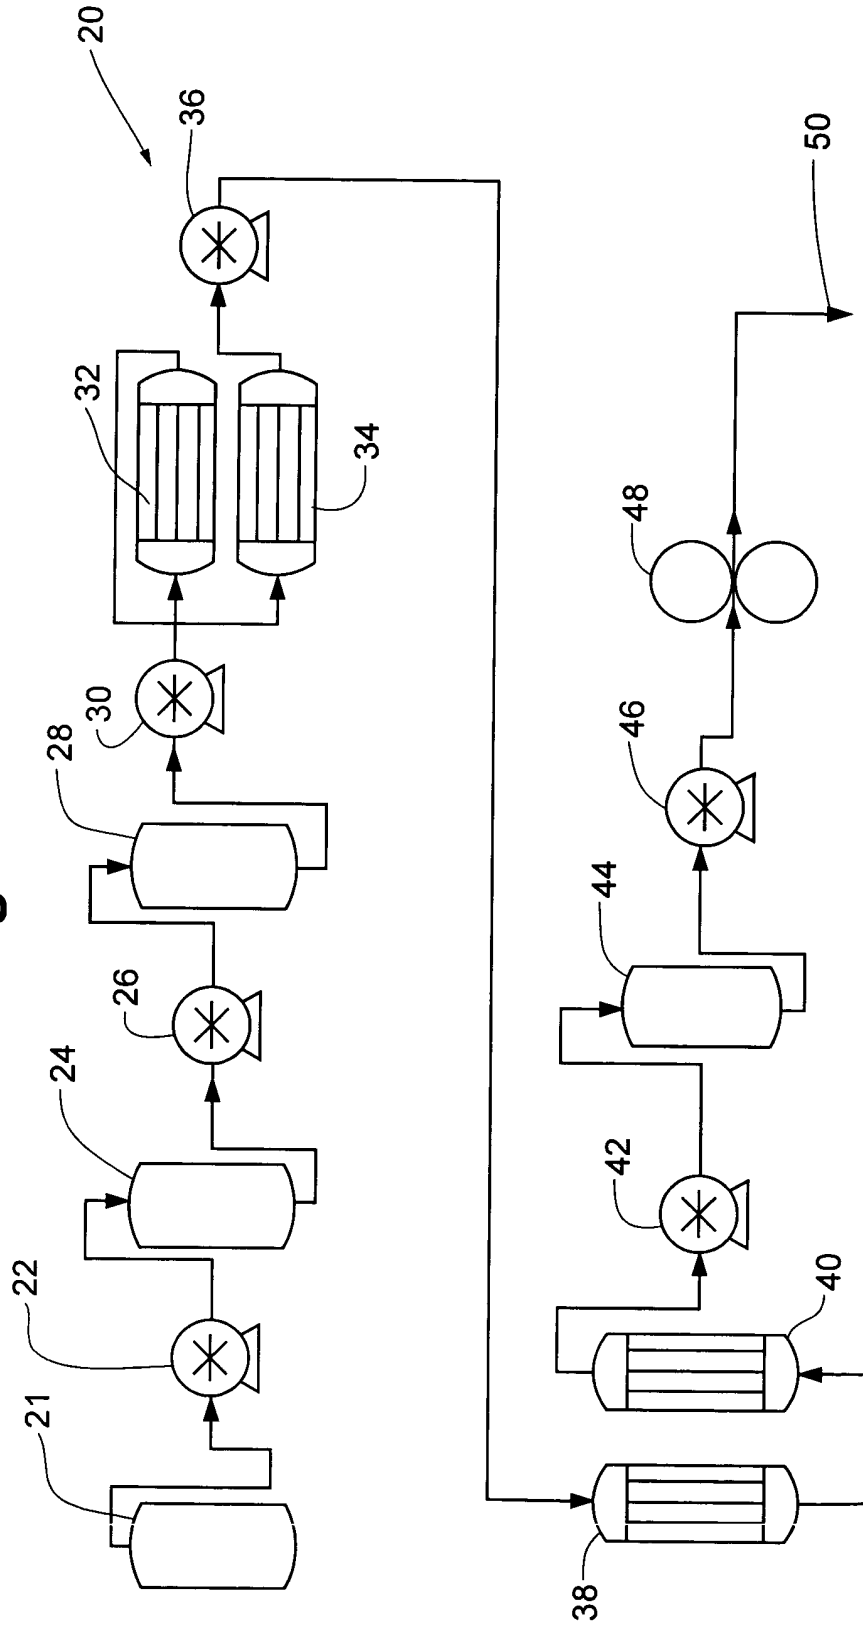

Fig. 2

The diagram illustrates a water supply system 60. It features a main water supply 66 at the bottom left, which feeds into a pump 20. The output of pump 20 goes into a storage tank 22. From tank 22, the water flows to pump 24, which then feeds into storage tank 26. The output of tank 26 goes to pump 28, which feeds into storage tank 30. The output of tank 30 goes to pump 62, which feeds into a pump 64. The output of pump 64 is connected to a main water supply 66. The main water supply 66 is also connected to a pump 68, which feeds into a storage tank 70. The output of tank 70 goes to a pump 72, which feeds into a main water supply 72.
